CRYSTAL CLEAN™

# Chandelier Cleaner

**JUST A FEW MINUTES A MONTH KEEPS  
YOUR CHANDELIER SPARKLING BRIGHT.**

There is nothing quite like the sparkling effect of light playing on the facets of a lead crystal chandelier, but the increasing popularity of chandeliers has unfortunately led to an equally increasing amount of very labour intensive cleaning.

'CRYSTAL CLEAN'™ chandelier cleaner is a unique and proven labour saving formula, perfected by professional restorers over more than four generations, charged with cleaning the very finest chandeliers in the world. The well tested and proven system of application avoids the need to take down or dismantle chandeliers or decorative lighting.

By popular request 'CRYSTAL CLEAN'™ chandelier cleaner has now been made widely available to all owners of attention seeking chandeliers.

It is environmentally friendly, just spray it on - it drips dry, removing all traces of grease, grime, stubborn nicotine or dust, leaving no smears or sticky residue and is guaranteed to be safe for all crystal.

Firstly, turn off or unplug light fitting and allow to cool. Once cooled, cover lightbulbs with plastic cups or clingfilm. Remove glass based dish and chrome plate. Then, simply spray crystals generously from top downwards until all are thoroughly wet and

dripping freely. To loosen deposits, rub crystals as you spray, gently between forefinger and thumb.

Allow to dry thoroughly for at least 2 hours before replacing chrome dish and base dish and then blot any remaining drips with soft absorbent cloth or tissue.

Because of its ease and economy of use, a few minutes a month with 'CRYSTAL CLEAN'™ chandelier cleaner will keep those crystals sparkling in the way only a well-groomed chandelier can.

Non-toxic, odour-free and non-corrosive 'CRYSTAL CLEAN'™ chandelier cleaner will not damage wiring, metal parts or lacquer.

You can also efficiently clean: cut crystal glasses, glazed porcelain, gold leaf, chrome, gold, silver, marble and mirrors, with complete assurance.
